WORK EXPERIENCE

Software Engineer BigBinary

12/2020 - Present

Remote

Worked on two client projects:

- **Bright Software, Inc. (Present):** Developed core features, notably an AI conversational chat system, enhancing employee training engagement.
- Drove user growth from hundreds to 60k+, establishing the platform as a leader in immersive learning.
- Leading the advancement of Generative AI for personalized learning experiences.
- Tech Stack: React, Node.js, PostgreSQL, AWS (EC2).
- **RESO: (Real Estate Standards Organisation):** Built an interactive web app from scratch facilitating certification of real estate data standards compliance.
- Developed major API endpoints, significantly improving process efficiency.
- Tech Stack: React, Node.js, Docker, ElasticSearch.

Product Developer SurveySparrow

11/2019 - 12/2020

Kochi, India

- Expert in native integrations with apps like Salesforce and Intercom, shaping product decisions and research.
- Notable achievements include custom domain verification, affiliate marketing integration, and a survey management portal.
- Skilled in tech implementation, mentoring, and continuous improvement
- Tech Stack: Node, React, React Native, PostgreSQL

Programmer Analyst Trainee Cognizant Technology Solutions

06/2019 - 10/2019

- Helped me dive into the world of web with Angular, Spring Boot, and more.
